Russell

"Man plainly senses the [motion](#) of a plane, or boat, or a speeding bullet and thinks of it as a [direction of motion](#). He sees the [motion](#) of a [wave](#), or the [vibration](#) registered by a **harp string**, or the [cardiogram](#) of a [heart pulsation](#). His senses also interpret these as [motion](#), and [directions of motion](#), not knowing that they are but registering the [curvature of gravity control](#), and that the [direction of motion](#) is [ninety degrees](#) removed from that [direction of gravity control](#)."
