

# human being

## Schauberger

For **Nature** to **punish** those **individuals** responsible for the dreadful **fate** of millions upon millions of **human beings** was impossible. She therefore had no other **alternative** but to **condemn** the whole of **humanity**, the most dangerous of **Nature's** **trouble-makers**, to **death** by **starvation**. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

## In General

In the same way that it would be impossible, for example, for **human beings** and **animals** to **reproduce** and further **develop** (**increase** and **qualitatively** improve), were **Nature** not to enforce an **interaction** between their **primary sexual substances** through intolerable **urge-driven differences** in **tension**, which **function reactively**, there would likewise be no possibility for the **reproduction** and further **development** of **plants**, **minerals** and **metals**, and the **physical** (**active**) **forms** of **heat** and **cold**. Today's **science** is not only founded on a false **developmental basis**, but also on too low a level of **knowledge**. It ignores the **formative reaction** and using **combustion processes** gives pride of [The Energy Evolution - Harnessing Free Energy from Nature, The Practical Application of Cycloid-Space-Curve-Motion arising from Processes of Cold Oxidation]

**economy** and **industry** secular **science** instructed and taught the **opposite** 'winding'. Therefore, in lieu of the **evolution-fostering** (**ennobling**) **spirit**, it raised and reinforced the **demon** in the **form** of **development-impeding** **electricism**, as if by **conveyor belt**, to such an extent that the **magnetism-generating Earth**, which moves in **cycloid-spiral-space-curves**, is now incapable of **neutralising** the **decomposive energies** and their **effects** produced by millions upon millions of **human beings**. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism - Electricism]

Apart from those who are happy to **extract** **Nature's** failed **products** such as **oil**, directly from the **ground**, there are others who make it their life's **work**, so to speak, to **earn** their living by **meddling** in wise **Nature's** affairs. These **species** of **human being** are commonly called **chemists**, who are known to **produce products** of **fermentation** without taking **Nature's** **dynamic processes** into account. Without this there is no possibility for **reproduction** and further **development** of any kind, because things possessing these **properties** have come into **being** through **movement**, during which **differences** in **temperature** arise that **initiate intermediate metabolic processes**. These then give **rise** to **flow-alternating processes** that **engender products** of **organic synthesis**, which is what concerns us here.
