

# interactive function

## Viktor Schauberger's Microscope Evidence

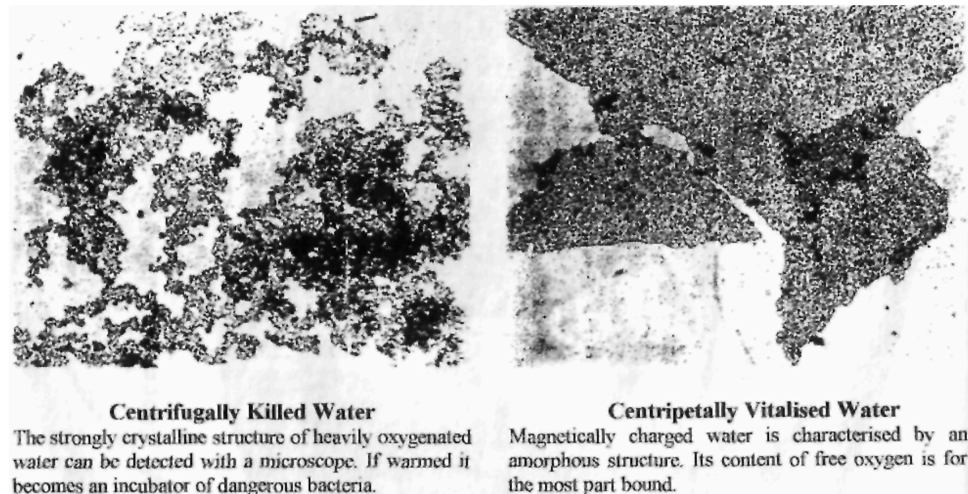

Fig. 6

([click to enlarge](#))

Biomagnetism is [quality](#). Its [adversary](#) is all forms of [over-illumination](#), [over-heating](#) or [centrifugally](#) engineered increase in [pressure](#). In this case [bio-electricity](#) is produced, which, in the form of an [atomic force](#) of excess [pressure](#), possesses energies that function [electrolytically](#) and [over-acidify](#), [decompose](#) and [kill](#) all forms of [life](#) and [growth](#). In the light of this, the [deterioration](#) of [rivers](#) and [lakes](#) becomes quite understandable. Since [biomagnetism](#) is [quality](#), it follows that there is no constant [conservation of energy](#) in the presently accepted sense. There is likewise no [equivalence](#) between [mass](#) and [energy](#) and no insuperable [force of gravity](#) within the [atmospheric envelope](#). All there is, is a [rhythmical interplay](#) between [bipolar component forces](#), which ultimately inaugurates the final [degeneration](#). In their **interactive function** as [atomic pressural or suctional forces](#) and through the [biological vacuum](#) thereby created, they also produce the best and cheapest [driving force](#) for machines. [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Biological Vacuum - The Optimal Driving Force for Machines](#)]
