

interatomic vibration

Mr. [Keely](#) proceeds to theorize upon this assertion: "conjecturing that [luminosity](#) might possibly be induced by **inter-atomic vibrations**, under certain conditions; adding, "but it would necessitate exploring an unknown field, which might, in its wonderful intricacies, absorb a series of years. This would be a [variation](#), and I never deal in [variation](#), on [high tenuity](#)." [[COMMENTS OF JOHN WORRELL KEELY ON DR SCHIMMELS LECTURE](#)]
