

law of reciprocity

Schauberger

Space and volume are *inversely disposed opposites*, which *consume* or *animate* one another depending on whether one is made to *burn* by the other or

is itself *ennobled* intrinsically through this *reciprocal intensification* and *polarization*. Today's technology mistakenly chose the former of the two processes and it is therefore no wonder that *cancer* is on the rampage here, there and everywhere.

Goethe said, "The driving wheels of *Nature* are *polarity* and *intensification* and whoever understands enough to untie also knows enough to bind." What is born in *light*, *disintegrates* in the *coolness* of the *ground*. It rises up and returns again as a *ray* of *energy* in order to *quicken* that which stands ready to become new *life* at the boundary between *space* and *volume*.

Every leaf is an *animalistic magnet* in *monoplanar form*, which *attracts* and *radiates*, depending on whether the *Sun* shines on it or *cold* caresses it. This great **law of reciprocity** also operates in *water*, which constantly *restructures* itself by altering its *space* and *volume*. The *space* is shaped by *light* and *heat*. The *volume* is a product of *darkness* and *coolness*. If we understand how to apportion the *opposing relation* between *space* and *volume* and how to organise its intrinsic *structure*, then the *substance* - *water* - will become '*The Space*' and the formless *volume* its realisation, which is transformed instantaneously with *heat-pressure*, thereby creating the *motion* that fills the over-lying *inter-space*.

If *nature-alienated humanity*, however, reverses this purposeful process and *combusts* precisely those *substances* that occasion *life*, then they should no longer be surprised when the *Sun* burns up that which serves it as an *intermediate space*, and which serves humankind for the maintenance of *life*.

Life unfolds itself in *three spheres*:

1. in the *Carbone*[5] - sphere
2. in the *Atmosphere*
3. in the *Stratosphere*

The *connection* between these spheres is created by *water*. Conversely, the various *states of aggregation* of *water* form the *bridges* for the *formation* and *reconstitution* of the basic elements carried by *water*, which succeed in reaching the *Earth's* interior from the *stratosphere* and vice versa. The purely mechanical *circulation* of the physical form - *water* - operates in the opposite direction to the *circulation* of *energy*. The *rising* of the *C-substances* with their carrier - *water* - is countered by the sinking of the *oxygen*. Where these

[5] *Carbone*: In contrast to the normal use and definition of '*carbon*', Viktor *Schauberger* grouped all the known elements and their compounds, with the exception of *oxygen* and *hydrogen*, under the general classification of '*Mother Substances*', which he described with the word '*Kohle-stoffe*', normally spelt '*Kohlenstoffe*' and meaning *carbon*. Apart from the above definition the hyphen also signifies a higher aspect of *carbon*, both physically and energetically or immaterially. The additional V in the English word is therefore intended to redefine and enlarge the scope of the usual term '*carbon*' in accordance with Viktor's concepts. On occasion *carbone* will be represented by the term C' [to] differentiate it from the normal term for *carbon* — C - Ed.

mutually *contra-directional currents* intersect, *energy* is freed. These *energetic interactions* can never reach a *state of rest* due to the constant variation in the length of *night* and *day*. Inevitably therefore, there is a continual shift in the individual microclimatic conditions, which further result in variations in the *quantity* and *quality* of the basic elements. That is to say, with very particular [types](#) of [motion](#) in specially [formed](#) and [alloyed](#) [development-facilitating devices](#), the [preconditions](#) described in the preceding paragraph are satisfied, and because of this the 'Eternally Feminine', as [Goethe](#) called this [creative essence](#), can press its [counterpart](#) ([oxygen](#)) into the [centrepoint](#) of this [battle](#) and conquer it (see fig. 10). The [immutable **law of reciprocity**](#), without which there can be no [naturalesque motion](#), nor anything brought to [life](#), was overlooked, disregarded or deliberately suppressed, "[Nulla poena sine lege](#)" (no [punishment](#) without [law](#)). At this point it should be noted that this always involves a [law of reciprocity](#), or that the [bipolar basic substances](#) are [inversely](#) related both [symmetrically](#) and [proportionally](#).
