

# levitative current

## Schauberger

The devices for practically implementing the [generation](#) of the [bio-magnetic formative](#) and **levitative current** with the aid of [reactive temperatures](#) (naturalesque expressions of [temperament](#)) have now been invented and in principle can be [mass-produced](#). [[The Energy Evolution - Harnessing Free Energy from Nature, Bio-Technology: Active and Reactive Temperatures](#)]

The [raw materials](#) out of which this [fine matter](#) arises under very specific [preconditions](#), consist of the [naturalesquely interred earthly remnants](#) of [former life](#). On no account are they senselessly and purposelessly reduced to [dust](#) and [ashes](#), but once again, under particular [preconditions](#), they [develop](#) into the 'peculiar' [axis](#) in the [form](#) of the [formative](#) and **levitative current** mentioned earlier. This [spiritualising](#) and [uplifting current](#), which [inwinds](#), [upwardly impels](#) and [whirls](#) around like a [tornado](#), is partially [condensed](#) by the above [heat-forms](#) and can be readily [measured](#) and [generated](#) in any [quantity](#) and [quality](#) almost without cost. By means of this [formative](#) and **levitative current** all [growth](#) can be increased and [qualitatively](#) improved almost at [will](#), and any [weight](#) can be lifted or moved indirectly at any desired [speed rotationally](#) and / or [vertically](#) with a [power](#) that increases by the [square](#). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

It would take too long here to describe the necessary [preconditions](#) through which it is possible to build up the [energy-sources](#) (the 'higher' [temperature-forms](#)) out of which the [formative](#) and **levitative current** - characterised in the title as the 'life-creating current' - comes into [being](#). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]
