Schauberger

The fact of the matter, however, is that through these totally perverse procedures and all manner of unnatural activities, everything we are experiencing today that is difficult, disgraceful and degrading of human [dignity](#) had inevitably to happen. Deductively [thinking logicians](#) have therefore over-looked the [causes](#) of the supposed [effects](#), out of which, depending on whether the [form of motion](#) is [natural](#) or [unnatural](#), the respective [ancillary forces](#) that either [affirm life](#) or [negate](#) it come into [being](#). In this regard the [life-denying forces](#) increase, [reproduce](#) and advance themselves in exactly the same way as their [counterparts](#), which promote the naturally ordained course of further [development](#) through increase and [qualitative](#) improvement. This would be impossible, however, were it not for the [temperature-forms](#) responsible for [expelling](#) what is [inferior](#) and for [purging](#), [purifying](#) and [detoxifying organisms](#). It is out of these [temperature-forms](#) that the [decomposing](#), [analysing cavitation current](#) arises, which today's [science](#) uses in the widest variety of ways and without exception for a supposed [build-up](#) of [culture](#). Clearly the misfortunes we shall have to reap will be all the greater, the more widespread and intensive the activity of a [science](#) that makes use of these [lower-grade temperature-forms](#). [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Life-Current in Air and Water](#)]
