

mass-movement

Schauberger

My allegations in this regard were construed as an affront to the honour and prestige of the Establishment and I was requested to provide written proof of these provocative assertions to the university professors I mentioned by name. This I also did and without exception they all had to capitulate. I could prove to them that as a result of [techno-academic systems of motion](#) - a [predominantly centrifugal](#) form of **mass-movement** - an [atomic \(electrolytic\)](#) excess [pressure](#) builds up in the [structure](#) of the [basic elements](#), thereby producing an increase in [temperature](#); in other words, a [feverish condition](#). In contrast, an [atomic \(magnetic\)](#) low or [negative pressure](#) is generated through a form of [planetary mass-motion](#) in which [centripetence](#) predominates. This gives rise to a [concentrative, negative pressure](#), which functions as a [biological vacuum](#). It was discovered as early as 1908 by Professor [Ernst Ferdinand Sauerbruch](#), who recognised that neither [breathing](#) nor [expansion](#) of the [lungs](#) would be possible if the [biological vacuum](#) were not to exist. He was declared a [fool](#) all the same and dismissed without notice when he told his superior, Professor [Mikolitsch](#), the following:

"Were there no [vacuum](#) between the surface of the [lungs](#) and the [pleura](#), no [intake](#) of [breath](#), nor [resistanceless expansion](#) of the [lungs](#) would be possible. Everything would suffocate were this [biological vacuity](#) to be filled with normal, [atmospheric pressure](#) through any form of [perforation](#)."
