In the aforementioned patent applications it was stated in no uncertain terms, where the causes of these [regressive symptoms](#), including [cancer](#), were to be sought, which imperil all growth and highly evolved forms of [life](#). In these applications I made the observation that it was the method of moving [water techno-academically](#) which in every respect is destructive and which is solely responsible for the economic decline, the rise in social privation and the constant increase in political unrest. [Techno-academic motion](#) is so called, because it is taught in all academies and universities in the form of the [centrifugence](#) of medial structures ([earth](#), [water](#) and [air](#)) and in every dictionary it is described as an 'unnatural' (unreal) form of [acceleration](#). In spite of this it is used today in all areas of industry in its exceptionally [centrifugating](#) form, because no other method of [acceleration](#) is known. It will therefore continue to be used everywhere until a more rational source of power is discovered.

Observations over many years of the almost motionless stationary [trout](#) in rushing mountain streams led to the discovery of the best and cheapest source of **mechanical power**. It is a form of [energy](#) that promotes healthy growth and will free [humanity](#) from the technology that presently enslaves it. Founded on a [biological vacuum](#), it will provide the basis for a [quantitative](#) and [qualitative](#) increase in productivity, thereby solving the pressing problem of more and more people and less and less food. The political turmoil now apparent everywhere can easily lead to the third and last World War, which if [atom bombs](#) are used, will mean the end of civilisation. This should certainly be reason enough to consider the following seriously even though it may appear utopian at first sight, an aspect that should offer no further impediment once the academic expertise derived from the misinterpretation of fundamentals collapses like a house of cards. Nor should it be rejected because many occupations that are more or less parasitic will be eliminated in the process. We are here concerned with the existence or non-existence of millions of people in all countries of the world.

For more than a century it has been known that [water](#) emits [ionising radiation](#), if it is discharged through a system of [straight jets](#) under pressure (see figs. 1-36). Hitherto unknown, however, was the following: If these [rays](#) are braked by a [filter](#) composed of [fatty substances](#) ([paraffin wax](#)) and conducted in bundled form into a [vacuum-tube](#), then they [incandesce](#) on the inner surfaces, producing a dark [red](#), strongly [pulsating glow](#) when the tube is earthed. This effect is similar to [sheet-lightning](#). If these [rays](#) are amplified in [Leyden jars](#) and then conducted into inflammable liquids or gases, they ignite the latter. This is how the [fire](#) started in the [Hindenburg](#), which was filled with [hydrogen](#) and became [earthed](#) when its [ballast-water](#) was released. The [crowning law](#) of today's [technology](#) is therefore no [natural law](#), but the [biological consequence](#) of a tragic [error](#) of contemporary [science](#). For if the [naturalesque metabolic process](#) is initiated through equally [naturalesque impulses](#) (*il primo movere*), then as the [velocity](#) increases owing to the additional [input](#) from the [inwinding rotary current](#), the [power](#) increases by the [square](#). The [outcome](#) of this [developmental process](#) is an almost [cost-free](#), [development-promoting](#) **mechanical power** - the [evolving water](#) (viz. the [atomised water vapour](#)). [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Life-Current in Air and Water](#)]

'Conventional' [science](#) and [fire-spitting technology](#) naturally do this very differently, indeed in a diametrically opposed fashion. They exploit [hot processes](#) of [oxidation](#) as the [developmental basis](#) for the [build-up](#) of a [decomposive](#) and [retrogressive force](#), which in [Nature](#) is employed for the recall for [reconstitution](#) of what is unfit for [development](#). No wonder therefore that this type of [force](#) reacts, with [resistances](#) that increase by the [square](#), against the [insanity](#) of its wrongful [exploitation](#) for the purposes of the [build-up](#) of [culture](#). Therefore the [crowning law](#) of today's [technology](#), the [conservation of energy law](#) and the so-called [heat equivalent](#) are founded on an unnatural [developmental basis](#). To put it plainly, contemporary [science](#) and its [technology](#) have backed the wrong horse and have ridden it for so long, or have sacrificed the available [raw materials](#) to [power](#) precisely the opposite [force](#) to such an extent as to drag in an [economic collapse](#) by its head and shoulders. It has not understood how to copy the ideal [method](#) of [generating power](#) and [formative energy](#), or through the [naturalesque transformation](#) of inferior [raw materials](#) into [quality products](#), how to make the [natural sources](#) of [energy](#) available in unlimited [quantity](#) for a virtually [free](#), silent and [development furthering](#) **mechanical**

power. [[The Energy Evolution - Harnessing Free Energy from Nature, New Forms of Motion and Energy](#)]

then even higher [forms](#) of [temperature influence evolve](#) with which all that we so commonly call '[growth](#)' can be regulated at [will](#). In addition, we are provided with [waxing](#), [self-generating motive forces](#), which [intensify](#) by the [square](#), making **mechanical power** of every kind virtually [free](#) of cost and therefore worthless according to today's values. According to higher [concepts](#), however, they become valuable for the first time, for in comparison the [motive forces](#) in use today are not only as good as worthless, but are also responsible for the fact that things are deteriorating all the more rapidly, the wider the scope of today's [technology](#), or its [intensification](#). This realisation is consistent with the fact that this [excremental technology](#), which exploits these [perverted energies](#) for [propulsion](#), is virtually at an end, because [oil](#) is already in short supply and the [stocks](#) of [wood](#) and [coal](#) are quite unable to cover the demand. As things now stand, nobody knows what is to replace them. [[The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy](#)]
