

# needle-jet

## Schauberger

In every respect, experiments with this [formative](#) and [levitative \(synthesising\) current](#) produced surprising results. Thus, for example, 2,000,000 [volts](#) per [drop](#) of [water](#), which were measurable, visible and palpable, and therefore incontrovertible, could be freed with appropriate [charge-releasing devices](#). With 50 pairs of **needle-jets** about 200 million [volts](#) can be produced for virtually nothing, for which today's [science](#) requires giant machines. Even then it can only produce an exceptionally [disintegrative \(analysing\) current](#), which has [life-negating properties](#). This is to be [differentiated](#) from the [formative](#) and [levitative](#), therefore [life-affirming, functions](#) of the [synthesizing current](#) mentioned elsewhere. [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]
