

negative condition

Keely

"If the [sympathetic condition](#) of any [physical organism](#) carries a [positive flow](#) of 80 per cent on its whole [combination](#), and a [negative](#) one of 20 per cent., it is the [medium](#) of [perfect assimilation](#) to one of the same [ratio](#), if it is distributed under the same [conditions](#) to the [mass](#) of the other. If two [masses](#) of [metal](#), of any [shape](#) whatever, are brought under [perfect assimilation](#), to one another, their [union](#), when brought into contact, will be instant. If we live in a [sympathetic field](#) we become [sympathetic](#), and a tendency from the [abnormal](#) to the [normal](#) presents itself by an [evolution](#) of a purely [sympathetic flow](#) towards its [attractive centres](#). It is only under these [conditions](#) that [differentiation](#) can be broken up, and a pure [equation](#) established. The only [condition](#) under which [equation](#) can never be established is when a [differential disaster](#) has taken place, of 66 2/3 against the 100 pure, taking the full [volume](#) as one. If the 66 2/3 or even 100 exists in one [organ](#) alone, and the surrounding ones are [normal](#), then a [condition](#) can be easily brought about to establish the [concordant harmony](#) or [equation](#) to that [organ](#). It is as rare to find a **negative condition** of 66 2/3 against the [volume](#) of the whole [cerebral mass](#), as it is to find a [coincident](#) between [differentiation](#); or, more plainly, between two [individuals](#) under a [state](#) of [negative influence](#). Under this new [system](#) it is as possible to [induce negations](#) alike as it is to [induce positives](#) alike." [Keely - Cure of Disease]

"Electricity is the result of three [differentiated sympathetic flows](#), combining the [celestial](#) and [terrestrial flows](#) by an [order](#) of [assimilation negatively attractive](#) in its character. It is one of Nature's efforts to restore [attractive differentiation](#). In analyzing this [triple union](#) in its vibratory [philosophy](#), I find the highest [order](#) of perfection in this [assimilative action](#) of Nature. The whole condition is [atomic](#), and is the introductory one which has an [affinity](#) for [terrestrial centers](#), uniting magnetically with the [polar stream](#); in other words, uniting with the [polar stream](#) by [neutral affinity](#). The [magnetic](#) or [electric forces](#) of the [earth](#) are thus kept in stable [equilibrium](#) by this [triune force](#), and the chords of this force may be expressed as 1st, the [dominant](#), 2nd, the [harmonic](#), and 3rd, the [enharmonic](#). The value of each is, one to the other, in the rates of figures, true [thirds](#). E flat- [transmissive chord](#) or [dominant](#); A flat- [harmonic](#); A double flat- [enharmonic](#). The union of the two [prime thirds](#) is so rapid, when the **negative** and the [positive conditions](#) reach a certain range of vibratory [motion](#), as to be compared to an [explosion](#). During this action the [positive electric stream](#) is liberated and immediately seeks its [neutral terrestrial center](#), or [center of highest attraction](#)."
