

neutral attraction

same as [GRAVITY](#), initiated by [NEGATIVE VIBRATION](#) as opposed to [POSITIVE VIBRATION](#).

Keely

"The [aerial propeller](#) has a [sympathetic polar accumulator and disperser](#) in one [instrument](#), which is entirely distinct from any of the [devices](#) intended for [terrestrial](#) use; also other [mechanical adjuncts](#) not needed on land nor water.

All forms of [non-sympathetic machinery](#) have, associated with them, [conditions](#) of [centrifugal force](#) on the [ratio](#) of the [velocity induced](#); the [diverging power](#) from the [center of induction](#) being governed specifically by its [gravital weight](#) according to the [diameter](#) it occupies in its [circle of rotation](#).

In a [sympathetic negative circuit](#) this [order of conditions](#) is [reversed](#); for the [power](#) of **neutral attraction** draws the [molecules](#) of any [mass](#), no matter what the [weight](#), toward the [center of rotation](#) (instead of toward its [periphery](#)) according to the [intensity](#) of the [negative vibration](#) that is [induced](#) upon that particular [circle](#).

Our [earth](#), in its [routine](#) of [revolution](#), is governed by the same [law](#) in every particular; its [mass](#) tending toward its **centre of neutrality** with a [force](#) that is [equivalent](#) to the [character](#) and [velocity](#) of its [rotation](#).⁽³⁾ If its [rotation](#) were [increased](#), the [tendency](#) of everything associated with it would be [increased](#) toward its **centre of neutrality** on the same [ratio](#). That is, a [pound](#) in [weight](#) would, under certain [conditions](#) of [increased velocity](#), become two [pounds](#) in [weight](#). The [laws](#) governing the [sympathetic rotation](#) of [vibratory machinery](#) are the same [laws](#) that govern [planetary suspension](#). To those who have not witnessed the [operation](#) of my [devices](#), my [theories](#) must indeed seem wild; but the [laws of nature](#) are the same yesterday today and forever. They know no change; and [sympathetic physics](#), demonstrated mechanically, must triumph over all [ridicule](#) and [opposition](#) in the end. To [contradict](#) the [laws](#) governing [sympathetic rotation](#) is to [contradict](#) the [laws](#) governing [planetary suspension](#), as I am prepared to demonstrate.

If the [earth](#) were [rotated](#) on a [shaft](#) by [mechanical force](#), the present [condition](#) of its [rotations](#) would be [reversed](#); everything on its [surface](#) would fly off at a [tangent](#), on the [ratio](#) of the [velocity induced](#). The [equilibrium](#) of all things would also be changed.

The [gyroscope](#) reveals astounding facts in relation to this [philosophy](#), even when operated [mechanically](#). No other known [device](#) is so nearly associated with [sympathetic vibratory physics](#).

The [vitalization](#) of the [disks](#) for the [polar and depolar field](#) is established on the [ratio](#) of [thirds](#), [sixths](#), and [ninths](#); the [ninths](#) being the [circuit](#) occupied by the [polar field](#), must represent, in the [scale of vitalized focalized intensity](#), 100 in my system: [sixths](#) in the [depolar field](#), or $66 \frac{2}{3}$; and in the **neutral field**, or [thirds](#), $33 \frac{1}{3}$. The [triplets](#) must represent one true [chord of equation](#). The [sympathetic transmitter](#) transfers any [degree of intensity](#) desired from [zero](#) up to [disintegration](#); all the [transfers](#) being made above the [line of the first inaudible](#), as associated with my [resonating system of transfer](#). On the [sixths](#) and [ninths](#), in the [progressive triple subdivision](#) of the [elements](#) (4) of [water](#), the nearest [sympathetic approach](#) is made to the [high luminous](#), which is the main [sympathetic link](#) to the [earth's polar negative envelope](#), and the one whereby [coordination](#) is effected for [commercial work](#). In short, this [progressive condition](#) establishes the necessary [association](#) between [celestial radiation](#) and [terrestrial outreach](#), in regard to controlling the [polar negative attractive force](#) in [mechanics](#); whether for [aerial navigation](#) or for [terrestrial commercial work](#), in all its multiplied forms.

The [atmospheric envelope](#) of our [earth](#) owes its [activity](#) and its [volume](#) entirely to [celestial radiating forces](#).⁽⁵⁾ Reception and dispersion are kept up by [atomic](#) and [interatomic conflict](#) between the [dominant](#) and [enharmonic currents](#) of the [triune polar stream](#). The [harmonic](#) and [enharmonic current](#) with the [dominant](#) (in the [electric stream](#)) by their [sympathetic association](#) evolve the [energy of matter](#).

The [mechanical proof](#) of the correctness of my [theories](#), in [sympathetic](#) or [spiritual physics](#), is so overwhelming in its [simplicity](#) that it needs but to be witnessed to convince the most learned or the most simple mind that this

system will place both science and commerce on a platform which will elevate each to a level far higher than those they now occupy." [The Operation of the Vibratory Circuit]

"The terms "**neutral attraction**", "*neutral affinity*", "*negative attraction*", or "*polar negative attraction*", are employed to express the *property* of a mode of vibration to direct its components towards such *center*." [KEELYS PHYSICAL PHILOSOPHY - Snell] [See Syntropy]

"The question arises, how and by what means are we able to measure the *velocity* of these *capsules* and the differential range of their vibratory action? Also, how can we prove beyond dispute the facts relating to their *sympathetic* government? By progressive *disintegration*; this is the only way; and it is accomplished by the proper *exciters* of vibratory *focalization*; the *introductory acoustic impulses* which *negatize* their *molecular*, *atomic* and *interatomic* media of **neutral attractions**, towards their focalized centers of *sympathetic aggregation*."
