

octave wave shaft

"He, likewise, divides His **Omnipresence** by centering every particle of creating matter in His whole limitless universe with the **still Light** of His own PRESENCE. From each **center** where He thus stands, He reaches out his right arm to one pole, and His left arm to the other one, to form a **shaft** around which each separate **unit of all Creation** must move to manifest the cycles of His **thinking**. In this manner each **Mind-centered body** in all **Creation** has at its command, and as its inheritance, all-power and all-knowledge to draw upon in the measure of man's **desire**, and in the measure of the awareness of **God's** centering Presence within each **unit**. [**Atomic Suicide**, page 107]

"**God** begins each electric **thought-wave** at a point of His **White Light** at the intersection of the **three inner planes of the cube**, which are at right angles to each other. This **point of beginning** is the **wave fulcrum**. It is also the point of **idea-conception** in **Mind**. It is the **centering eye** of the **inert gas** of the elements which springs from that **plane**. It is, likewise, the **cathode** center of man's **electric current** and the beginning of the **wave-shaft** which extends two ways to divide the **red** half of the **spectrum** from the **blue**, to create separated **father** and **mother** bodies. Here also is where **time** and all other **dimensions** begin, as well as all other effects, such as **life**, **compression**, **polarization** and **heat**. Here also is where all depolarizing dimensions and effects end and disappear into invisibility, **silence** and cold stillness of **space**." [**Atomic Suicide**, page 112-113]

God creates three pairs of **disunited male and female bodies** upon His extending **octave wave shaft** - and then a **united, balanced pair** at His **thought wave amplitude**. This united, balanced pair is an incandescent sphere. At **that point in the wave**, and that only, the disunited **father** and **mother** unite as **ONE** at its **white center**. One of its hemispheres, however, is still the **red light** of the **father** (**syntropy**) and the other one is the **blue light** of the **mother** (**entropy**); for each is still extended from its centering **Oneness**." [**Atomic Suicide**, page 111-114]

"Know thou that **God** does not extend His Self into his moving universe, for the **God-Light** is still. Its **stillness** centers all things - and it, likewise, centers the **shafts** of all motion which turns around it, **shafts** which are levers of fulcrums)) and end at **poles** which measure extensions." [**Atomic Suicide**, page 116]
