

# omnipresence of gravity

"These things man must know together with the **omnipresence of gravity** which but seems to the [senses](#) to extend into [shafts made up of many points](#), which are all [ONE](#)." [[Atomic Suicide](#), page 170]

"The human Mind has not quite progressed to that point where it can separate [illusion](#) from its [cause](#), and our difficulty in clarifying the illusion is due to the aeons in which we have seen boats, planes, clouds, people and countless other expressions of energy move from place to place within the **omnipresence of gravity** to simulate that energy, which they are but expressing." [[Atomic Suicide](#), page 284]
