

# over-illumination

## Schauberger

These explanations provoked a veritable storm of protest in academic circles, forcing me to equip myself and go into action with somewhat heavier artillery. In response to the objections raised during the preliminary patent assessment, I then submitted the following supplementary explanation:

1. As **inseparable trinities**, the media of **earth**, **water** and **air** are the natural **accumulators** of **bio-magnetic** and **bio-electric dynagen** concentrates. These are extremely sensitive to **pressure** and **heat** and may only be accelerated artificially in the original (**primordial**) way, i.e. **planetarily**, wherein **cooling** effects must **predominate**. Any abnormal increase in **heat**, no matter from what cause, triggers **unnatural interactions** between **basic elements** at the expense of the **negatively surcharged, biomagnetic dynagen concentrates**.
2. All **over-illumination** and **over-heating** immediately provokes the release of **decomposive energies**; whether **heating** is the result of **sunlight** or [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

## Viktor Schauburger's Microscope Evidence

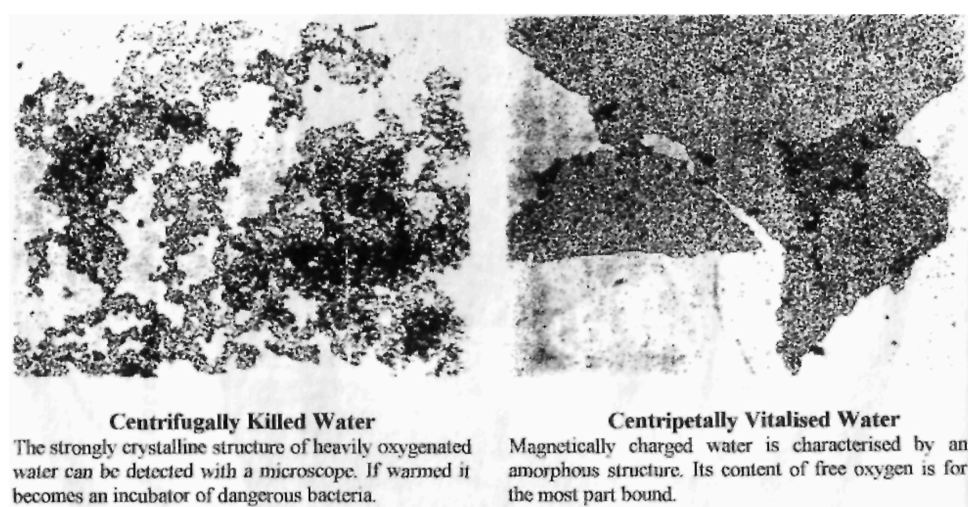

Fig. 6

([click to enlarge](#))

**Biomagnetism** is **quality**. Its **adversary** is all forms of **over-illumination**, **over-heating** or **centrifugally** engineered increase in **pressure**. In this case **bio-electricity** is produced, which, in the form of an **atomic force** of excess **pressure**, possesses energies that function **electrolytically** and **over-acidify**, **decompose** and **kill** all forms of **life** and **growth**. In the light of this, the **deterioration** of **rivers** and **lakes** becomes quite understandable. Since **biomagnetism** is **quality**, it follows that there is no constant **conservation of energy** in the presently accepted sense. There is likewise no **equivalence** between **mass** and **energy** and no insuperable **force of gravity** within the **atmospheric envelope**. All there is, is a **rhythmical interplay** between **bipolar component forces**, which ultimately inaugurates the final **degeneration**. In their **interactive function** as **atomic pressural or suctional forces** and through the **biological vacuum** thereby created, they also produce the best and cheapest **driving force** for machines. [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

"What is the present outlook in the field of energy **generation**? One word suffices - catastrophic! Through **over-illumination** and **over-heating** of the media of **earth**, **water** and **air** in **Nature's** household, a **short circuit** - 'cold fire' - and the development of **cancer** has been triggered off. With **nuclear fission** a **conflagration** was kindled, whose ashes and slag residues alone will extinguish all **life**. Thus a reporter stated recently, "For the time being this radiating thing is there and with it the attendant worries as to how we can protect ourselves against these lethal **rays**, which **penetrate** even the thickest **lead shields**." The sheer **lunacy** of using **nuclear power** for peaceful purposes will be just as short-lived as the subsequent **remorse** will be long." - **Viktor Schauburger** -
