Keely

"The laws governing the polar current are intimately concerned in the **phenomena** of rotation." [POLAR CURRENT]

"Taking the law of assimilation as the cosmical law, together with self-manifesting power as the characteristic of being, we reach a primary classification of created objects, which corresponds with that which is known as mind and matter - or rather let us say mind and that which is not mind; for there is ground for the apprehension that mind and matter do not include all that exists; and that, along with matter, ether ought to be considered as something intimately related to matter indeed, but yet not just matter. When the elements of the ethereal medium are regarded as truly and simply material however small and light they may be, the elasticity and pressure which must be assigned to that medium in order to admit of the velocity of light, are altogether out of the harmony of things; and wholly incredible, especially when confronted with the **phenomena** and the theory of astronomy. Thus, to justify the velocity of light on the same principles as those of sound, in various material media, the ethereal pressure must be 122,400,000,000 times greater than that of the atmosphere - which is incredible, says Macvicar." [Law of Assimilation]

Schauberger

To contemporary technology, physics and chemistry the following are so far unknown:

1. The form of motion used by Nature herself (i.e. the cycloid-space-curve as the creative form-originating motion);
2. The temperature-form T2;
3. The flow-forms F1 and F2 and the **phenomena** of elemental transformation resulting from them. [The Energy Evolution - Harnessing Free Energy from Nature, NEW FORMS OF TEMPERATURE]

These **phenomena**, still unknown to conventional science, I have already exploited practically for the extraction and transport of otherwise untransportable timber in log-flumes at Neuberg in Steyring and 14 other installations around Europe.[2]

[1] aethero-energetic: This essentially refers to energies belonging to the 4th and 5th dimensions of being. — Ed.

[2] See references to log-flumes on pp. 82 & 107 of The Water Wizard, Vol I of the Ecotechnology series. - Ed. [The Energy Evolution - Harnessing Free Energy from Nature, NEW FORMS OF TEMPERATURE]

To group A belong all falling and concentrating heat-forms and all cold-forms, which initiate rising and expanding **phenomena**. To group B belong all rising and expanding heat-forms and all cold-forms having falling and concentrating effects. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

A third case will be mentioned here, albeit briefly. If under very particular external influences good high-spring water is rotated at high speed in turbines with blades inclined at a certain angle, then on occasion the effective force rises exceptionally high; by calculation to peak pressures of about 32,000 atmospheres, leading to corrosive damage to the turbine blades. More detailed elaboration would take too long here, and therefore it should be enough to point out that these three **phenomena** are known facts. [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]

We therefore arrive at the following transformative **phenomena**:

1. The inner constituents freed through mechanical abrasion (removal of the outer envelope) are transferred into two different states due to the cooling of the carrier-substance. Through this increasing cooling the terrestrial substances or carbonates attain their relatively highest potential. [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]
