The cathode in Nature is the still point of Magnetic White Light of Mind from which motion begins to compress in two opposite directions to create sex-divided bodies. Gravity begins when compression begins. Polarization and compression are ONE.

"Not one [action](#) of [motion](#) by man or [Nature](#) - in all the [universe](#) - can escape from the absolute [centering](#) of its [action](#) by the [Controller of all action](#). Anything, or any man who tries to escape from it, or use his "[free will power](#)" to do as he chooses, may exercise that privilege, even unto destroying himself by so doing. He will not escape, however, from the perpetual control of his [universal energy Source](#). No matter what he does, to upset the [universal balance](#), he will find that the [Creator of Creation](#) always [centers](#) him, and his own unbalanced [orbit](#) is still on center with his [unbalance](#), and is perpetually in a **plane of 90 degrees** from the [shaft](#) upon which its circlings turn." [[Atomic Suicide](#), page 171]

"Our knowing Mind, however, attributes that seeming change of position to [gravity division of omnipresent Oneness](#), and attributes its cause to the [direction of motion](#), which spins around this direction at an **angle of**

**ninety degrees** from it. To clarify this new thinking we shall go back to *the electric wave within which all of the secrets of Creation are hidden*. Bear in Mind that the **electric wave** is the divider of ONE into **four pairs** which constitute ONE. As we explain this thought turn back to figures 17 to 29 - to give objectivity to them." [Atomic Suicide, page 284-285]

"When our senses tell us that a speeding bullet is not a **direction of motion** it is difficult to think of it as **stillness** which is centering fast moving motion. It might help to remold your concept by imagining a motionless, floating cloud which changes its position because of a wind. The **direction of motion** is not in the cloud.

"It is in the spiraling of the wind. The cloud is still in the same position in relation to **gravity** even though its position has been changed by motion, which is outside of itself, for it is still floating at **rest**. Even the slightest change in its position of **stillness** causes a **spiral motion** to encircle it and **spin** around it at an angle of **90 degrees** from its **gravity shaft**, which extends from the earth. It may be quite an effort to comprehend that **stillness** cannot change, but can seem to." [Atomic Suicide, page 285-286]

"Nor would they have come to the conclusion stated by them had they observed the majestic example in the heavens of all the planets, suns, spiral nebulae and galaxies which, without exception, turn in planes which parallel their equators, and always at **90 degree angles** from their **polar shafts**.

"Every planet and sun in the heavens spins in the same direction that a speeding bullet spins. That direction is **90 degrees** from the direction of the speeding bullet, which is always the eye of the **cyclone** its motion is producing." [Atomic Suicide, page 286]

"The great error of this drawing is that **pressure mirrors** of Nature, such as **radar**, are not erected upon **planes** which follow the **direction of polarity** - or **gravity shafts**. On the contrary, they are erected in **planes of 90 degrees** to **polarity**, or **gravity shafts**." [Atomic Suicide, page 295]

"Nowhere in Nature do **pressure walls** exist which are not **90 degrees** from the **direction of polarity**." [Atomic Suicide, page 296]

The **plus** and **minus elements dissociated** from the **water separate** from one another. The small **quantities** of **carbone** present in poor **quality water** make their **escape** immediately, because they **dematerialise** themselves. The **phos-elements**[3] **incorporated** by the **Sun disperse**, enter the **horizontal potential field**, become highly **aggressive**, spread themselves over the **active substances** and await things now **imminent**. The 'imminent' is a **geospheric gas**, which is **ingested** with great **cold**. [The Energy Evolution - Harnessing Free Energy from Nature, Letter to Werner Zimmermann]

By means of **mechanical diffusion** this **transmitter generates** a **horizontal potential field** and rapidly **cools** the **gas mixture**. Having become highly [The Energy Evolution - Harnessing Free Energy from Nature, Letter to Werner Zimmermann]
