## Schauberger

Professor [Sauerbruch](#) was unaware that this [vacuum](#) comes into being through the **planetary movement** of the [blood](#). Had he known, then [medicine](#) would have taken a completely different course.

I was further able to prove that because contemporary machines operate using [centrifugence](#), [resistances to motion](#) with a [reactive function](#)[12] are

11 Here the German word is 'Qualitatstoff', which literally means 'quality-matter, or [substance](#)'. With this [Viktor Schauburger](#) intended to describe a higher, [4th](#) or [5th dimensional magnitude](#) of pure [quality](#) as a thing in itself and as the [driving force](#) in the raising of [quality](#) of whatever kind as a 'quality-producer' or 'quality-generating substance' or [energy](#). The English expression term 'qualigen' used here, is a [contraction](#) of the two words 'quality' and 'generator'. — Ed.

12 [Active](#) and [reactive](#) energies, [temperatures](#), etc.: 'Active' essentially relates to the more [physical dimension](#), to what is outwardly physical and perceptible, physically palpable, gravitationally affected or oriented, and [life-negating](#), i.e. to energies that tend to curb, limit and brake [life](#), [evolution](#) and [development](#). 'Reactive' on the other hand relates to more [metaphysical dimensions](#), to what is inwardly physically intangible, levitationally affected or oriented, and [life-affirming](#), i.e. to energies that tend to foster, re-animate and accelerate [life](#), [evolution](#) and higher [development](#). - Ed.
