

precondition

Schauberger

"All motion consists of two components. One component serves inwardness (internalisation) and the other outwardness (dispersion). Both **preconditions** for motion regulate the eternal flow of metamorphosis (panta Rhei)[1]." [Schauberger, Implosion Magazine, No. 57, p.5.]

[1] panta Rhei:: process of change, everything flows

When Robert Dormer's two representatives asked me to explain the essential nature of implosion, I told them that the correct choice of catalysts was one of the decisive **preconditions** for the success of a high-grade emulsion (the inner intermixture of bipolar basic elements). In this regard science defines a catalyst as a substance that alters the speed of a reaction by acceleration or deceleration. For the chemist catalysis signifies 'dissolution', whereas viewed bio-catalytically this is understood as the 'release' from inner urges and yearning. As this explanation is unscientific and therefore of little 'use', various examples will be examined in order to explain the concept of 'bio-catalysts', while not exactly scientifically, nevertheless naturalesquely. [The Energy Evolution - Harnessing Free Energy from Nature, The Catalysts]

The raw materials out of which this fine matter arises under very specific **preconditions**, consist of the naturalesquely interred earthly remnants of former life. On no account are they senselessly and purposelessly reduced to dust and ashes, but once again, under particular **preconditions**, they develop into the 'peculiar' axis in the form of the formative and levitative current mentioned earlier. This spiritualising and uplifting current, which inwinds, upwardly impels and whirls around like a tornado, is partially condensed by the above heat-forms and can be readily measured and generated in any quantity and quality almost without cost. By means of this formative and levitative current all growth can be increased and qualitatively improved almost at will, and any weight can be lifted or moved indirectly at any desired speed rotationally and / or vertically with a power that increases by the square. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

It would take too long here to describe the necessary **preconditions** through which it is possible to build up the energy-sources (the 'higher' temperature-forms) out of which the formative and levitative current - characterised in the title as the 'life-creating current' - comes into being. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

Here we are concerned above all with a conformity with a natural inner law of reciprocity today entirely unknown to science. That is to say, with very particular types of motion in specially formed and alloyed development-facilitating devices, the **preconditions** described in the preceding paragraph are satisfied, and because of this the 'Eternally Feminine', as Goethe called this creative essence, can press its counterpart (oxygen) into the centrepoint of this battle and conquer it (see fig. 10). [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

Letter to Werner Zimmermann. June 20th 1936

From Spec. Ed. Mensch und Technik, Vol. 2, 1993, section 7.4.

Read "The Ox and the Chamois"[1] again. There you will find precisely the opposite **preconditions**, namely the release of energy through cold. Here heat

[1] See "The Ox and the Chamois" in Nature as Teacher, p.41, Vol. II of the Ecotechnology series. — Ed.] [The Energy Evolution - Harnessing Free Energy from Nature, Letter to Werner Zimmermann]

is first generated through friction. This heat is immediately absorbed by the water and in the process a physical vacuum is created, which then gives rise to the emergence of inner-atomic rays. Due to the absorbed heat, the free, dissolved oxygen still present in the water becomes aggressive and the emergent geospheric rays become aggressive owing to the presence of the vacuum. Through the encounter between the mutually opposed, contra-directionally propagated, excited rays, the **precondition** for the marriage is created. The child of this union is organic, or cold light. [The Energy Evolution - Harnessing Free Energy from Nature, Letter to Werner

Zimmermann]

Another **maxim** states: "All **life** arises from **motion**." Since it is known that without **death** there would be no **life**, there must be two **forms** of **motion**. One that **produces** the **life-state** and another that creates the **preconditions** for this to happen. In other words, there must be two completely different **types** of **motion**, which **function** in equally different ways. One of them **produces** the '**physical**' **life-state**, whereas the other the **prerequisites** for it[4] by **initiating** the '**metaphysical**' **transformation** and **actuating** the **processes** through which the **products** of this **form** of **motion** can be brought into **being**. [The Energy Evolution - Harnessing Free Energy from Nature, The Ennoblement of Water]

The actual **formative instrumentalities** are always present and only come into play under very particular **preconditions**. Any **human** with the **organic capacity** can make use of one or the other **attribute** in order to **beget** the '**crown of creation**', a young **child** for example, provided he or she is at all capable of becoming **aroused** and **surrender** themselves to the particular **motion** ordained by **Nature** for **reproduction** and further development. [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]

When two people do the same thing, it is never exactly the same, and all the more so, if something is **initiated** under completely different **preconditions**, which is here the case in a practical sense. [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]
