

recoil

Russell

"Man makes a big gun by making a long tube which he seals at one end and places an explosive there. He even puts a twist in the bore of the gun; to accelerate the [spin of motion](#) around the [still shaft](#) which centers that tube. That motionless explosive occupies one still position in this [zero universe](#) until he ignites it. What then happens? A [two directional explosion](#) takes place. *The **recoil** is equal to the [discharge](#)*, so he might just as well have left both ends of the gun open as far as the effect of [polarization](#) is concerned. The **recoil** was the opposite [direction of polarity](#), as that explosion began its [division of stillness](#) throughout the entire universe, at the [speed of 186,400 miles per second](#).

Let us analyze what has happened. The center of the explosion is an unchangeable [point of stillness](#) in the [Magnetic Light of Creation](#), but we will call it [gravity](#) because we are seemingly dividing it into a [shaft](#). Because of the tube the explosion cannot expand symmetrically and radially from the point in space which it occupied while still, for it is not enclosed in a [sphere](#). It is enclosed in a [shaft](#). Its [spinnings](#) encircle the walls of the tube at [ninety degrees](#) to the [still shaft](#), which is developed because the explosion can no longer be centered as one point in space, and, therefore, have but [one center of gravity](#) instead of many. It becomes a [series of points in space which form a shaft](#). If you can now comprehend that if the explosion within that tube is obliged to change position and move its [centering point of stillness](#), the projectile which moves is, likewise, a [sequence of points of stillness](#)? You cannot see a projectile being ejected from the other end, but its equivalent is in that **recoil**." [Atomic Suicide, page 291]

Schauberger

A small, [temperature-increasing](#), [material](#) or [physical axial->radial impulse](#) suffices to [transform](#) such a [concentration of highly critical threshold matter](#) in a [latent state](#) into the relatively most powerful, [destructive energy](#), whose [decomposive force increases](#) in [proportion](#) to the [strength](#) of the [impulse](#). Thus, for example, a [lightning-like recoil](#) in the [form of a descending ion](#) is [triggered](#), which with [elemental ur-force disintegrates](#) the resistance that [brakes its lightning descent](#). [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism is the Function of Levitism and Electricism is the Function of Gravitism]
