Keely

Mr. Keely does not accept [this theory](#). He says: "I consider the [sun](#) as a vast [neutral centre](#) to a [system of worlds](#), and that its **regeneration** depends entirely upon the [reactive sympathetic vibratory streams](#) which, [emanating](#) from its own [body](#), are received in the [system of worlds](#) it controls, and are sympathetically returned to it, to be projected again, until the [vibratory force](#), that has controlled it through the ages; is expended." Russell

"Generating [Mass](#) seeks higher [pressure](#) zones. Degenerating [Mass](#) seeks lower [pressure](#) zones. **Regeneration** is effected by [Degenerative Impact](#) in [inertia](#), thus reversing [sex](#)." [Russell]

Schauberger

As a result of all this the scales fell from the eyes of an ecclesiastical scholar, when I explained to him that the [earthly remains](#) of [life](#) ([mineral and metallic trace-elements](#)) were essential for the processes of [reproduction](#), **regeneration** and upward [evolution](#). Whereupon he responded, "My, but what a joke it would be, if we too had got hold of the wrong story! If the true [rigmarole](#) of the [resurrection](#) can only begin, when all the various [cadavers](#) are moved [planetarily](#) in the [womb](#) of All-Mother [Earth](#), a [motion](#) the [techno-academic school-aristocrats](#) have now turned inside out and into the opposite, then after we've gone every last remnant of culture must also disappear!" Cayce

"While it is true in nature that man sees spring follow the winter, summer the spring; and growth, and the glory of its harvest, and then the continued routine; but is not EACH spring as RENEWED life???"

So, does every act of love become in its application NOT AUTOMATICALLY but a? RENEWING, a **regeneration**, a GROWTH." [Cayce 601-11]

Sidney Gernsback

"The amplifying properties of the three-electrode [vacuum tube](#) can be used to obtain what is termed **regeneration**. Since it is possible to have greater output energy than input energy, part of the output may be returned to the input side thus resulting in amplification of [energy](#) or in **regeneration**. By feeding back the correct amount of [energy](#) and in the right [phase](#) relation a constant re-amplification may be obtained and the tube can be made to act as a [generator](#) of sustained oscillations." [Gernsback, Sidney; Radio Encyclopedia; Sidney Gernsback, 1927]
