

solar force

"The power of [attractive vibration](#) of the **solar forces** is the great [coincident](#) towards which the [terrestrial magnetic sympathetic flow](#) is diverted. This force is the [celestial current](#) that makes up the [prime third](#) of the [triple association](#). It also induces [aqueous disintegration](#) and [thermal concentration](#), the [two prime conductors](#) towards this [coincident chord of sympathy](#) with itself." [Vibratory Physics - The Connecting Link between Mind and Matter]
