

spiritual-physical universe

Fichte writes: "The **will** is the living **principle** of the **world of spirit** as **motion** is of the **world of sense**." Newton said that this subtle **ether** **interpenetrates** all **matter** and is concealed in their **substance**, through the strength and activity of which, bodies attract each other and adhere together when brought in contact, annihilating distance, as if objects might touch each other. Through this "life spirit" **light** also flows, is refracted and reflected and bodies are warmed. Pythagoras viewed this as a **divine luminous principle** or substance which permeates all things and at the same time contains all things. They called it the **astral light**. The Germans call it the "**Welgeist**". [JOHN ERNST WORRELL KEELY]

"A proper way to connect it to this **electric universe of motion** would be to term it the **Magnetic-electric universe**, meaning the **spiritual-physical universe**, or the **Mind-thinking universe**, in the sense that the **zero Magnetic universe** is the **Creator**, and the **motion universe** is **Creation**."
