The product of this [involuting motion](#), which always [converges](#) to a [point](#) while at the same time [curling](#) in upon itself, is [biomagnetism](#). That it is also contingent on the presence of [catalytic influences](#) will not be further discussed here. As such, [biomagnetism](#) extends itself [longitudinally](#) and [radiates](#) its [surplus energies vertically](#) and, for example, draws the [trout](#) along in its [wake](#). The [trout](#) can so regulate this [upsuctional force](#) with its [gills](#) that even its [motionless stance](#) and equally well-known mastery of [gravity](#) becomes understandable in the light of the above. The [weight](#) of physical [masses](#) only exists in the [atmospheric living space](#). Above this the [force of levitation](#) prevails as [inverted gravitation](#). Consequently, all [pressure-](#) and [heat-intensifying motion](#) must inevitably function all the more irrationally, uneconomically and [development-impedingly](#), the more it is [accelerated](#) and **strengthened**. To this end raw materials are squandered to such a degree that a growing dearth of them is unavoidable. Good [seed](#) in good [earth](#) produces a [multiple](#) of itself in [fruit](#). The [seed grows](#) and its [multiplication proceeds](#) with the aid of [contra-directional influences](#). These [influences](#) are [higher forms](#) of [organisation](#) stemming from the [Earth](#) and the [Cosmos](#). [Substances](#) that are [ripe](#) must either [fall upwards](#) or [downwards](#). When [water](#) is [decomposed inner-atomically](#), then what finally remains is the [substance - water](#), the [H-substance](#)[2]. This [H-substance](#) is the [polarity](#), which **strengthens** itself through these [influences](#). It is the [ur-child](#) that draws in [essences](#) and [energies](#) from [above](#) and [below](#) and in this way it [grows](#).
