## Keely

"The series of [experiments](#), daily for one week, that I am now preparing to give before an expert committee, for the purpose of enabling this committee to make a public announcement of the scientific and [commercial value](#) of my [system of sympathetic vibratory physics](#), comprises:

**First.** - Operation of the [polar circuit](#), drawing [power from space](#), and showing control of various [degrees of velocity](#).

**Second.** - Sensitization of a [polar disk](#), after having had its complete [neutrality to magnetism](#) tested.

**Third.** - After associating it with the [polar test-medium](#), heavily [weighting](#) it to demonstrate its [attractive power](#); the [weight](#) remaining **suspended** to it by this [power](#).(7)

**Fourth.** - [Transmitter](#) connected to the [test-medium](#), while the [disk](#) is carrying the [weight](#). [Negative vibration](#) transferred; effecting complete [dissociation](#); the [disk](#) and [weights](#) dropping to the floor.

**Fifth.** - [Rotation of compass needle](#), on a [set of resonators](#), [subservient](#) to any one of the [resonators](#), in [defiance](#) of its [attraction](#) to the [north](#). [Variations](#) given; changing its [subservience](#) to different [resonators](#), as the [introductory impulse](#) is changed.(8)

**Sixth.** - [Mediums](#), representing the [chords](#) of different [masses of metal](#), made to [float](#) in a tall [jar of water](#), with extraordinary [changes of position](#).

**Seventh.** - [Operations](#) of a [sensitized globe](#), by [sound](#).

**Eighth.** - [Operations](#) of the [globe](#) under the [influence](#) of the improved [polar sympathetic transmitter](#).

**Ninth.** - [Disintegration of water](#) by [triple vibration](#),(9) showing [progressive degrees of energy](#) (from [molecular](#) to [interatomic](#), etc., etc.) on different [rates of transfer](#)." [The Operation of the Vibratory Circuit]

## Schauberger

These [concentrations of subtle matter](#) are [bacteriophagous threshold conformations](#) (being neither [corpuscular](#), nor [metaphysical embryos](#)) in which the [opposing energy-forms](#) mentioned at the beginning are **suspended**, which [oscillate](#) gently in [liquid](#) or [gaseous media](#) in a [wavering state of equilibrium](#). That is to say, they possess too much [levitational force](#) to [gravitate](#) and too much [lower-grade mass](#) to [levitate](#) autonomously. Their [inner processes of motion](#) are [sustained](#) by the [ambient differences in temperature](#). These, however, are insufficient to determine the [fate](#) of these [threshold substances](#) as they [vacillate](#) at this [cross-roads](#). [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism - Electricism]

Accordingly we have to learn the lesson from both extremes and [balance](#) out both [forms of motion](#) and [acceleration](#) in such a way that in accordance with the well-known [equation  \$F = ma\$](#) , the desired [force F](#) in the form of a [predominantly magnetic ion](#) constantly [possesses](#) enough [levitational superiority](#) to ensure that [natural increase](#) and [qualitative improvement](#) can keep pace with the unavoidable [increase](#) in the [population](#). That is to say, the [standard of living](#) must be regulated through the use of [higher-grade \(quality-increasing\) retro-influent dynagens](#), which come into [being](#) when [bipolar threshold masses](#) are [centripetated](#) in accordance with the [equation  \$E = mc^2\$](#) . In other words, when they are [accelerated](#) by [radially->axially in-winding forces](#) to a [speed exceeding that of sound](#) under the simultaneous [effect](#) of a [falling temperature gradient](#), i.e. [accelerated](#) along the [longitudinal axis](#) above their [boundary velocities](#). This gives rise to the [higher-grade factors of temperature, light and energy](#) out of which [upwardly streaming magnetism](#) springs forth from the [spiritual embryos](#), the [vitamin-molecules](#) mentioned at the beginning. These are **suspended** in a delicately [balanced state of equilibrium](#) in the [media of air and water](#) and await the [naturalesque motive impulse](#) in order, as refined [subtle matter](#), to [transform](#) themselves into [formative, multiplying and ennobling retro-influent energies](#). This will signify the end of the present [shortages of food, raw material, germinating substances and fuels](#), and instead of

capitalism and bolshevism a true socialism will arise about which Christ preached 2,000 years ago, who taught of the transformation of matter into spirit with the aid of the above form of motion. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism - Electricism]

"In the outbirth of water we have to differentiate between two different kinds. Namely water as a carrier-substance that contains predominantly negative potentialities (substances attuned to earth frequencies) or predominantly positive potentialities (substances attuned to air frequencies). The former are to be viewed as upwardly-impelling geospheric instrumentalities and the latter as downwardly-impelling atmospheric instrumentalities. The former refine and exalt the higher-grade constituents, i.e. they serve the build-up of levitative potencies. The latter serve to cleanse the atmosphere of **suspended** matter, which as threshold substances still possess too little self-weight and too high a quota of levitative essences and can neither rise nor fall. It is these threshold substances that can be transformed and exalted through cycloid-space-curve motion. From a practical point of view, this is only possible through their co-oscillation with their respective carrier-substances, be it air or water. This leads to a build-up of those substances incapable of further development, resulting in a renewed intensification of the differences in potential through the spacial separation of the difference-substances. The end result is an increased motive force. This explains the concept of perpetual motion in its most natural sense." [Viktor Schauberger, Implosion Magazine, No. 118, p. 8.] [The Energy Evolution - Harnessing Free Energy from Nature, THE NATURE OF WATER - ITS CONDUCTION AND USE FOR TRANSPORT]

3. Through the rising acceleration of the axially moving core-water-masses, the centrifugence of the swirling peripheral water-masses intensifies. This in turn increases the slip-pressure exerted by the **suspended** ingredients on the naturalesquely shaped and alloyed potential-increasing slip-resistances (guide-vanes). Due to the rising velocities the oligodynamic effect also increases, i.e. more and more supplementary influences are freed by the potential-intensifying frictional resistances and due to the water's careful [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]
