

sympathetic evolution

Keely

"Physicists have been working in the wrong direction to lead them to associate themselves with Nature's **sympathetic evolutions**." [Newton of the Mind, Vibratory Physics - The Connecting Link between Mind and Matter]

"Recently some questions, propounded to Mr. Keely by a scientist, elicited answers which the man of science admitted were clear and definite, but no physicist could accept Keely's assertion that incalculable amounts of latent force exist in the molecular space, for the simple reason that science asserts that molecular aggregation is attended with dissipation of energy instead of its absorption. The questions asked were:-

I. "In disintegrating water, how many foot-pounds of energy have you to expend in order to produce or induce the vibratory energy in your acoustical apparatus?"

Answer.- "No foot-pounds at all. The force necessary to excite disintegration when the instrument is sensitized, both in sensitization and development, would not be sufficient to wind up a watch."

II. "What is the amount of energy that you get out of that initial amount of water, say twelve drops, when decomposed into ether?"

Answer.- "From twelve drops of water a force can be developed that will fill a chamber of seven pint volume no less than six times with a pressure of ten tons to the square inch."

III. "In other words, if you put so many pounds of energy into vibratory motion, how many foot-pounds do you get out of this?"

Answer.- "All molecular masses of metal represent in their interstitial molecular spaces incalculable amounts of latent force, which if awakened and brought into intense vibratory action by the medium of sympathetic liberation, would result in thousands of billions more power in foot-pounds than that necessary to awaken it. The resultant development of any and all forces is only accomplished by conditions that awaken the latent energy they have carried with them during molecular aggregation. If the latent force that exists in a pound of water could be sympathetically evolved or liberated up to the seventh subdivision or compound interetheric, and could be stored free of rotation, it would be in my estimation sufficient to run the power of the world for a century." [Vibratory Physics - True Science]

"I do not recognize light and heat as coming from the sun (as heat and light), for I have found both to be the emanations from atomic and interatomic interference when molecular vibration is induced by the "celestial attractive" through the medium of sympathetic etheric vibration. Physicists have not taken into consideration the **sympathetic evolutions** of Nature. They have been working in the wrong direction. I see nothing phenomenal in my explanation or theory, it only seems phenomenal to them from their theoretical view point of mechanical physics." [Snell Manuscript]

"I have spoken elsewhere of the almost infinite difficulties of getting into position, to hold hydrogen gas in suspension between soap film a proper period of time, to conduct these experiments. The setting of the other parts of the apparatus is quite easy in comparison. All wave propagations, electromagnetic or otherwise by being thus refracted can be measured in regard to the time of their propagation all of which are introductorily subservient to the luminiferous ether. The theory put forward by "men of science" in regard to electromagnetic forces shows that they are misled by the imperfection of their instruments. They are trying to measure the infinite by the finite, necessitating terms of avoidance, to the instantaneous propagation of nature's **sympathetic evolutions**, of the same nature as the one advanced in the assertion that a force does not exist in the interstitial embrace of all matter.
