

techno-academic

Schauberger

In the aforementioned patent applications it was stated in no uncertain terms, where the causes of these [regressive symptoms](#), including [cancer](#), were to be sought, which imperil all growth and highly evolved forms of [life](#). In these applications I made the observation that it was the method of moving [water](#) **techno-academically** which in every respect is destructive and which is solely responsible for the economic decline, the rise in social privation and the constant increase in political unrest. **Techno-academic motion** is so called, because it is taught in all academies and universities in the form of the [centrifugence](#) of medial structures ([earth](#), [water](#) and [air](#)) and in every dictionary it is described as an 'unnatural' (unreal) form of [acceleration](#). In spite of this it is used today in all areas of industry in its exceptionally [centrifugating](#) form, because no other method of [acceleration](#) is known. It will therefore continue to be used everywhere until a more rational source of power is discovered.

Observations over many years of the almost motionless stationary [trout](#) in rushing mountain streams led to the discovery of the best and cheapest source of [mechanical power](#). It is a form of [energy](#) that promotes healthy growth and will free [humanity](#) from the technology that presently enslaves it. Founded on a [biological vacuum](#), it will provide the basis for a [quantitative](#) and [qualitative](#) increase in productivity, thereby solving the pressing problem of more and more people and less and less food. The political turmoil now apparent everywhere can easily lead to the third and last World War, which if [atom bombs](#) are used, will mean the end of civilisation. This should certainly be reason enough to consider the following seriously even though it may appear utopian at first sight, an aspect that should offer no further impediment once the academic expertise derived from the misinterpretation of fundamentals collapses like a house of cards. Nor should it be rejected because many occupations that are more or less parasitic will be eliminated in the process. We are here concerned with the existence or non-existence of millions of people in all countries of the world.

For more than a century it has been known that [water](#) emits [ionising radiation](#), if it is discharged through a system of [straight jets](#) under pressure (see figs. 1-36). Hitherto unknown, however, was the following: If these [rays](#) are braked by a [filter](#) composed of [fatty substances](#) ([paraffin wax](#)) and conducted in bundled form into a [vacuum-tube](#), then they [incandesce](#) on the inner surfaces, producing a dark [red](#), strongly [pulsating glow](#) when the tube is earthed. This effect is similar to [sheet-lightning](#). If these [rays](#) are amplified in [Leyden jars](#) and then conducted into inflammable liquids or gases, they ignite the latter. This is how the [fire](#) started in the [Hindenburg](#), which was filled with [hydrogen](#) and became [earthed](#) when its [ballast-water](#) was released. The [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Biological Vacuum - The Optimal Driving Force for Machines](#)]
