

triple subdivision

Keely

"Keely does not give an analysis of the structure of the *etheric*, but from the fact that he was able to subdivide it through the same process of **triple subdivision** into *interetherons* we may assume that three *interetherons*, each with its *etheric capsule* whirling about it, existed within the *envelope* of the *etheron*, vibrating with an oscillatory frequency greater than any of the lower *subdivisions*. [Snell Manuscript]

"Physicists have been working in the wrong direction to lead them to associate themselves with Nature's *sympathetic evolutions*. It is not necessary to advance farther into the unexplored region of these *sympathetic flows* than the *ninths*, to become convinced that the one I denominate the *dominant* is the leader toward which the remaining *thirds* of the **triune combination** (of triple *sympathetic streams*) co-ordinate, whether it be the *cerebellic*, *gravital*, or magnetic. When we reach the *luminiferous track* on the *ninths*, in the **triple subdivision**, we have proof that the *infinite* stream, from that unexplored region where all *sympathetic streams* emanate, is triune in its character, having the *dominant* as the *sympathetic leader*, to which the remainder of the *celestial thirds* are subservient; the *cerebellum* being the *dominant*, and the triplets (gravital, electric, and magnetic) following in its train." [Newton of the Mind]

"Keely has never made but one experiment in dissociating the *hydrogen* of the chemist. After a persistent effort of over seven weeks' duration, in his attempt to confine it and hold it under *assimilation* with one-third its volume of disintegrated air, he succeeded in obtaining a rather indefinite result, lasting only about ninety seconds. The *luminosity* shown was the only evidence he had of its *dissociation*; but, in his process of *disintegration of water*, he never fails to obtain proof of the **triple subdivision** of *hydrogen* - *molecular*, *atomic* and *interatomic*." [Newton of the Mind]

"Keely has discovered and was the first to demonstrate that *electricity* has never been handled; that it is not merely a *force* or a form of *energy*, - that it is *matter*; and that what we call *electricity*, and have diverted for commercial use in electric lighting, is but one of the *triune currents*, *harmonic*, *enharmonic*, and *diatonic*, which are united in pure *electricity*; that the *enharmonic current* seems to be sympathetically and mysteriously associated with the *dominant current*; and that the *dominant current* can no more be brought under control than can the *lightning* itself. The diversion of the *dominant current* would mean destruction to any mechanical medium used for that purpose, and *death* to the operator. The intense *heat* evolved by the *electric stream* Keely attributes to the *velocity* of the **triple subdivision** at the point of *dispersion*, as each triple seeks its medium of *affinity*. Sudden union induces the same effect; but demonstration shows that the *concentration* of this triple force is as free of *percussion* as is the breath of an infant against the atmosphere; for the *three currents* flow together as in one stream, in the mildest *sympathetic* way, while their *discharge after concentration* is, in comparison to their *accumulation*, as the tornado's force to the waft of the butterfly's wing. The *enharmonic current* of this *triple stream*, Keely thinks, carries with it the *power* of *propulsion* that induces *disturbance of negative equilibrium*; which *disturbance* is essential to the co-ordination of its flow, in completing the *triune stream of electricity*. When this fluid is discharged from the clouds, each *triplet* or *third* seeks its *terrestrial concordant*, there to remain until that supreme law which governs *disturbance of equilibrium* again induces *sympathetic concordant concentration*, continuing to pass through its evolutions, positively and negatively, until the solar forces are expended." [Keelys Contributions to Science]
