

two circuits

Keely

"The [introductory impulse](#) represents the [sympathetic chord of unity](#) to [polar attraction](#). When this is given, the [polar outreach](#) is immediately established in the [polar circuit](#), which seeks to [assimilate](#) itself to the [anti-polar](#), or [triple groupings](#); but as the [alternation](#) of the **two circuits** represents a [condition](#) of [sympathetic antagonism](#) (as 8 is to 9), an [intensified differentiated wave motion](#) is [induced](#) between the two, thus [developing](#) eight [alternations](#), or [waves](#), to one [revolution](#) of the [device](#)." [The Operation of the Vibratory Circuit]
