

ultimate particle of Creation

You will see them as rings of [light spinning around black holes](#). Those rings you see are divisions and extensions of the **"ultimate particles" of Creation**, for there is no other form in Nature than opening and closing rings. *They are the basis, and the [substance](#) of all form.* When they appear, [matter](#) appears. When they disappear, [matter](#) disappears, and all effects of matter with them, such as [sound](#), [color](#), [heat](#), [form](#), [density](#) and [dimension](#). See [Fig. 41.](#)" [[Atomic Suicide](#), page 143]
