## Schauberger

The product of this [involuting motion](#), which always [converges](#) to a [point](#) while at the same time [curling](#) in upon itself, is [biomagnetism](#). That it is also contingent on the presence of [catalytic influences](#) will not be further discussed here. As such, [biomagnetism](#) extends itself [longitudinally](#) and [radiates](#) its [surplus energies](#) **vertically** and, for example, draws the [trout](#) along in its [wake](#). The [trout](#) can so regulate this [upsuctional force](#) with its [gills](#) that even its [motionless stance](#) and equally well-known mastery of [gravity](#) becomes understandable in the light of the above. The [weight](#) of physical [masses](#) only exists in the [atmospheric living space](#). Above this the [force of levitation](#) prevails as [inverted gravitation](#). Consequently, all [pressure-](#) and [heat-intensifying motion](#) must inevitably function all the more irrationally, uneconomically and [development-impedingly](#), the more it is [accelerated](#) and [strengthened](#). To this end raw materials are squandered to such a degree that a growing dearth of them is unavoidable. [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Biological Vacuum - The Optimal Driving Force for Machines](#)]

If this [current](#) is conducted into [vacuum tubes](#), then they emit a strongly [pulsating blood-red glow horizontally](#) along the [elongated transverse axis](#) and a dazzling, motionless, colourless and temperatureless [radiance](#) **vertically** up the [elongated longitudinal axis](#), which fills the whole [space](#). [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Life-Current in Air and Water](#)]

The [raw materials](#) out of which this [fine matter](#) arises under very specific [preconditions](#), consist of the [naturesquely interred earthly remnants](#) of [former life](#). On no account are they senselessly and purposelessly reduced to [dust](#) and [ashes](#), but once again, under particular [preconditions](#), they [develop](#) into the 'peculiar' [axis](#) in the [form](#) of the [formative](#) and [levitative current](#) mentioned earlier. This [spiritualising](#) and [uplifting current](#), which [inwinds](#), [upwardly impels](#) and [whirls](#) around like a [tornado](#), is partially [condensed](#) by the above [heat-forms](#) and can be readily [measured](#) and [generated](#) in any [quantity](#) and [quality](#) almost without cost. By means of this [formative](#) and [levitative current](#) all [growth](#) can be increased and [qualitatively](#) improved almost at [will](#), and any [weight](#) can be lifted or moved indirectly at any desired [speed rotationally](#) and / or **vertically** with a [power](#) that increases by the [square](#). [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Life-Current in Air and Water](#)]

[palatable](#)[2] in order to act as [levitational fuel](#) for the others ([viz.](#) the branches swaying in the [wind](#), whose [source of motion](#) - the [wind](#) - also arises through [reactive differences](#) in [temperature](#)). The **vertically** disposed [forces](#) of [cyclones](#), [typhoons](#), [hurricanes](#), etc. are also founded on this [developmental process](#) and owe their kinetic energy to [cold processes](#) of [oxidation](#). [[The Energy Evolution - Harnessing Free Energy from Nature](#), [New Forms of Motion and Energy](#)]

But now to the [example](#) mentioned earlier: In the 'normal' course of [cellar fermentation](#) [two different](#) ([reactive](#) and [active](#)) [temperature differences](#) (this [two-fold concept](#) will be described later) [trigger](#) off that special [form of motion](#) which, after the [expulsion](#) of the [less valuable](#) in [two opposite directions](#), gives rise to [ethereal energetic matrices](#) that also operate in the same [two directions](#). A [destructive force](#) that [self-intensifies](#) by the [square](#) is [activated](#), whose [function](#) is to return to the [Earth](#) as quickly as possible, everything that would inflict [damage](#) on that which explains all [life](#) and [movement](#), and which moves in the other [direction](#) (**vertically**) towards its objective.
